The Marches Energy Grant (MEG) was launched in 2022. It offers free advice, energy assessments and grants for energy efficiency and renewable energy measures to SMEs from all sectors in Herefordshire, Shropshire, and Telford & Wrekin. The funding will also be available to support community buildings. As well as the grant funding, the project will also run related networking and webinar events for SMEs and other organisations.

Hereford Enterprise Zone Infrastructure is a £9.459m project which includes £6.107m of Local Growth Funds. It will include substantial infrastructure interventions to encourage business investment, occupancy and jobs. The range of works will open 10 hectares on the North Magazine site and help to prepare new plots for development. It will be carried out alongside the design and implementation of several Active Travel Measures and the purchase of an electric bus to encourage sustainable travel to and from the Zone.

Economic development schemes are underway in the county, including enterprise zones in Hereford and Ross. Herefordshire Council's local plan aims to deliver 16,500 new homes by 2031.

In September 2022, the Centre for Advanced Timber Technology (CATT) based at the New Mead Institute for Technology and Engineering (NMITE) was launched. It is designed to encourage active education in timber technologies. NMITE's developing campus will be used to enable the delivery of student centric learning, while building industry partnerships and supporting students in tackling real world challenges.

Herefordshire's new business registration rate (the rate of business registrations per 10,000 resident population aged 16 and above) was 57 compared to 62 in the West Midlands region and 71 in England.

The largest business sectors in Herefordshire are currently wholesale and retail trade, health and social work, manufacturing. 13% of the population are self-employed. Well-known businesses include: Bulmers, British Land, Cargill, Weston's Cider, Bloor Homes, and Tyrrells Crisps.

Herefordshire Council's Cabinet voted to approve and support the implementation of the Herefordshire Big Economic Plan, along with its initial five-year delivery plan. Led by the Herefordshire Sustainable Growth Strategy Board, and following a wide range of consultation, the Big Economic Plan is a partnership document, setting a collective vision for the future growth of the county.

**DIVERSITY & INCLUSION**

In the 2nd year of collecting data on Diversity and Inclusion, it has been interesting to see the progress that has been made across the 2 counties. Whilst many of the stats for the more advanced elements of D&I are the same year-on-year, we have seen progress in terms of companies starting to measure their demographics and use that information to make workforce planning decisions, including using anonymised CV screening and improved internal comms on the subject of D&I. This increase in information gathering and awareness-driving is promising as it is likely to generate more accountability and will result in positive action being taken.

One thing that we at Howett Recruitment have talked a lot about this year is shifting the paradigm of interviewing for "culture fit", which can inadvertently turn into "are you like us". Reframing our thinking into how someone can add to our culture rather than fit into it can really help remove some of the unconscious bias within a recruitment process.

- 74%** of organisations had Diversity and Inclusion as stated values or company objectives
- 49%** endeavour to make interview panels as diverse as possible
- 38%** make Diversity and Inclusion training programmes compulsory
- 14%** target recruitment at underrepresented groups

PRINT STRATEGY EUROPE

**MR & MRS SMITH**  
*checked in & started to save*

"The help we received was invaluable & to save money during the process was fantastic!"

Head of Advertising & Marketing Projects - Mr & Mrs Smith

**PRINT STRATEGY EUROPE**

**MR & MRS SMITH...**  
...is a boutique and luxury hotel booking specialist, featuring more than 900 of the worlds most stylish and unique places to stay. Membership benefits include money back on bookings, free upgrades, personal concierge service and a luxurious membership pack. Print Strategy was excited when the company first approached them to help redesign the membership boxes that are sent out to its top-tier members every year.

**THE SMITH BRAND...**  
...is synonymous with quality and style, so it was key that these qualities should be evident in its membership boxes - which include a personalised membership card, a bespoke letter and a Mr & Mrs Smith guidebook. Not only did the Print Strategy team create packs that the company were happy with, they also helped to reduce production costs by 15%. Print Strategy continued to help make further cost savings when they introduced new processes for membership and voucher fulfilment.

"We approached Print Strategy Europe in the hope of improving our membership packs and fulfilment service and, within a few days, we received an impressive array of samples and suggestions, which were on-brand and matched the brief precisely. The service we received was unfurling professional and friendly, the costings were very competitive and we are delighted with the quality of the finished product."

ISLINGTON

With its bold Art Deco style, the Islington furniture range makes an elegant and eye-catching statement.

Made from luxury Italian Carrara marble and dark wire-brushed acacia, the exclusive design features contrasting chic tones and softly curved silhouettes. Beautifully patterned, the polished marble top gives delicate natural detail with its white and grey veining.

Elevated on geometric-inspired legs and with brass-coloured accents, Islington creates a distinctive eye-catching look. Soft-close doors and classic carpentry techniques complete the range, making each piece a long-lasting and timeless addition.

The range includes a side table, a coffee table, a large sideboard, a console table, a multipurpose dressing table or desk, and a large TV unit.

The bedroom additions feature a bedside table, a 5-drawer tallboy, a 5-drawer chest, a 6-drawer chest, and a modern upholstered bed that has a tall winged headboard with matching dark-stained beech legs. The fixed dining table is paired with the matching acacia Isla chair with velvet-feel upholstery.

### AGILE ACCOUNTING

The coronavirus pandemic has forced many people to work remotely. However, don't expect to return to the office full time forever – indeed, half of all CFOs plan to make remote working a permanent option even after the pandemic has subsided.

An agile working setup is not the same as remote working. Agile working means that you'll be able to work in different locations at different times, whilst still meeting the demands of the modern workplace.

Cloud storage is an essential piece of technology for agile working. Over two-thirds of accountants identified that cloud computing accountancy software will help them increase efficiencies and productivity going forward.

By using the cloud, and similar digital technology, accountancy professionals can provide their clients with a more nimble service. This also leads to greater flexibility for accountants themselves by having access to their computing systems, client information and inventories from any internet-connected device, they can work more flexibly and in a way that suits them.

### BENEFITS

- Expands your talent pool
- Supports diverse lifestyles
- Creates happier employees

### WHAT DO WE KNOW?

- The future accountant is tech-savvy, mobile-friendly and comfortable using mobile platforms to service clients.
- Cloud solutions will become standard.
- Technology will generate a new revenue stream in audit protection services for accounting professionals.

LIMEHOUSE LAUNCH

DESIGN  
HOUSE

Our cabinets are the perfect marriage of old and new. Bulky framed doors feature an innovative fascia panel that flows us to create the crisp linear finish within a stable, strong structure.

Our point-pending hinges take a bulky unattractive piece of hardware and re-engineer it into sleek ball hinges, discreetly built into a hidden frame with an off-centre pivot to make sure the doors close smoothly every time.

Our trademark zig-zag shelving is given a modern, industrial upgrade using a polished stainless steel bar for a sleeker, more contemporary finish. Each cabinet door features a new magnetic soft-close catch concealed behind an oak disc.

Most modern kitchens have a handle bar. We wanted something a bit more glamorous. So we took inspiration from hinge design and added the ball feature to the bar. The finished handle is tactile, stylish and striking.

THE LIMEHOUSE  
KITCHEN

This is the result: the horizontal lines captivate on the light and shadow, and create elongated proportions that strike the right balance between tension and flow. The crisp finish, industrial stainless steel, recessed kickboard and under-counter shadow use a subtle variation in colour and light to enhance the feeling of texture and emphasize the strong linear features of the centre cabinets.

We introduced a frame to the wine racks, appliance housing and full-height cabinets to break the linearity and give these individual features more presence. Corner and intermediate posts punctuate the horizontal flow and allow flexibility in the design so that cabinets can be grouped together to create large-style islands or ladders.

We are authentic, traditional hues that have a warmth that resonates with Limehouse's design heritage. The Limehouse style blends modern and organic materials in a fresh, vibrant and neutral palette. There is a real tactility to every stripped-back detail, so that every handle, surface or stone drawer divider appeals to all the senses. The result is tactile and evocative, functional and fresh.

ALL IN  
THE DETAIL

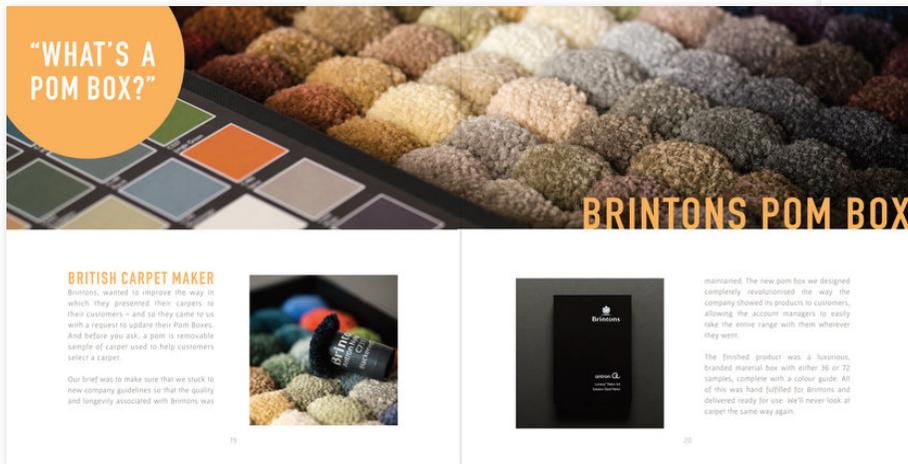

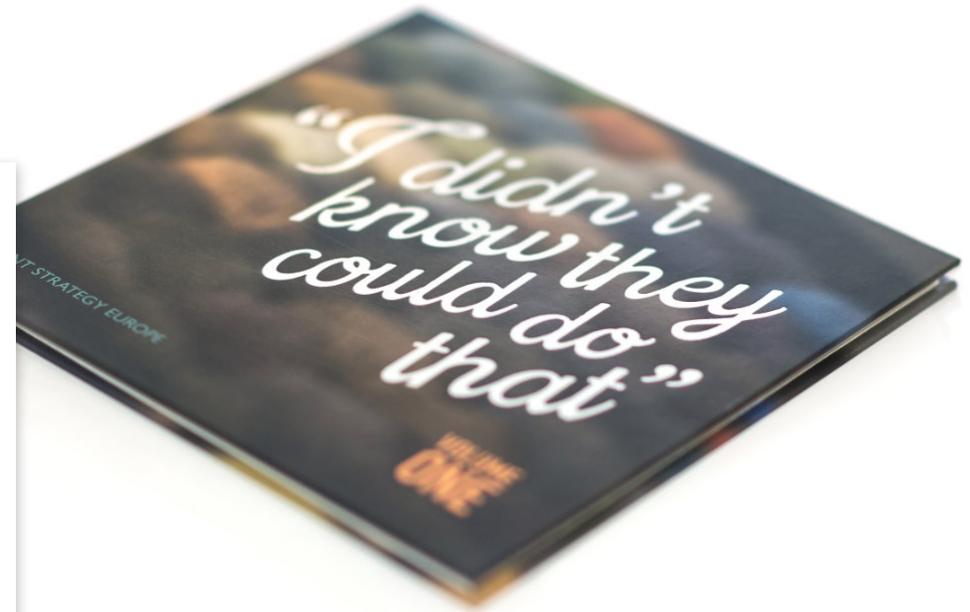

Our Limehouse cutlery drawer has a series of long troughs with sliding stone dividers. The lovely mix of old and new, natural and industrial materials creates a playful, flexible and extremely tactile design.

Design should make life easier and more stylish. Why shouldn't that apply to taking out the rubbish? So we re-engineered the bin cabinet so you can pull it out and practically throw it back in so it falls into place. Easy, fast and mess-free.

All our appliance cabinets use technical joinery to ensure the housing is multipurpose. A multitude of different combinations of dishwashers, dryers and washing machines are possible so you can fully maximize your space.

We have carved little lips or 'V's into the spice shelves and wine racks to help your wine and spice bottles fall naturally into place.
